LARSEN & TOUBRO
Engineering the Change

ANALYTICAL THINKING DRIVEN BY DESIGN THINKING

Topic Name : Analytical thinking driven by Design Thinking

Sub Topic : Journey Mapping

Name : Traver Dera

Roll No : 2K25MEUN01171

Sem : 2

Course : CRITICAL THINKING , DESIGN THINKING,
LEADERSHIP AND TEAMWORK

Institution : Manav Rachna University

Faculty : BADRINARAYANAAN SIR

1. USER RESEARCH (Smart Water Bottle)

- Most users forget to drink water during busy schedules
- Users rely on thirst instead of proper hydration tracking
- Many people do not measure daily water intake
- Users prefer simple, automatic solutions over manual tracking
- Mobile-based reminders are commonly accepted

2. USER PERSONA

Name: Rahul Sharma

Age: 21

Occupation: Engineering Student

Location: Faridabad

Demographic Info

- College student
- Busy academic schedule
- Uses smartphone regularly

Goals & Objectives

- Stay healthy and hydrated
- Improve daily routine
- Maintain energy levels throughout the day

Psychographic Info

- Health-conscious but inconsistent
- Interested in smart gadgets
- Prefers convenience over effort

Behavior & Preferences

- Often forgets to drink water
- Uses apps for reminders
- Likes simple, automated solutions

User Journey (short version)

- Starts day without tracking water
- Gets busy with classes
- Forgets hydration
- Feels tired → drinks water late

Challenges / Pain Points

- Forgetfulness
- No tracking system
- Lack of motivation
- Inconsistent habits

3. JOURNEY MAPPING

Start → Morning → Afternoon → Evening → End

Morning

- User starts day
- No hydration tracking

Afternoon

- Busy with work/studies
- Forgets to drink water

Problem

- Feels tired and dehydrated

Solution Interaction

- Smart bottle sends reminder
- LED/app alert triggers action

Result

- User drinks water regularly
- Improved hydration habit
